

VIRTUALLY
**UNBREAKABLE
EQUINE FENCING**
because... it's not PVC!

ELECTRICALLY CHARGED

Electric wire spirally embedded into the fence rails prevents cribbing, chewing and leaning. (Energiser not included)

FRIENDLY TO THE ENVIRONMENT

All materials used in the fence are non-toxic to animals and humans alike.

IMPACT RESISTANT

Made from High-Density Polyethylene this fence will not crack, splinter or shatter even at temperatures well below zero.

CUSTOMISED

Available in two, three, or four rail systems and in custom colours to suit your needs.

EQUI-SAFE FENCING

Warranty – 30 years
Made in Australia

INTERNAL WIRE CONNECTIONS

With all electrical connections in the post, there are no exposed, loose wires or electrical connections.

STRONG VISIBILITY

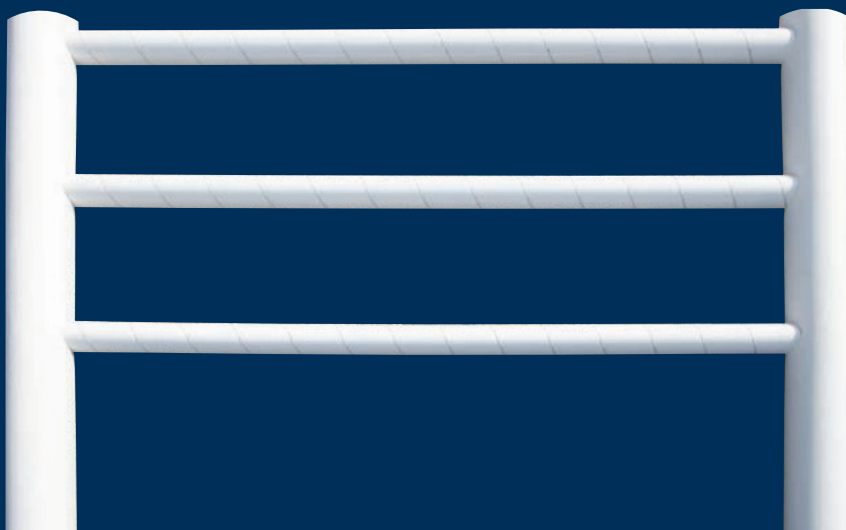

The large profiles of our 1.68m posts and 7.62cm rails are easily seen.

EASY INSTALLATION

Designed so that the farm-owner can install the fence themselves with modular pieces that assemble in minutes.

ALL-TERRAIN FLEXIBILITY

The flexible nature of the material allows it to be installed on uneven ground and in customised patterns.
